

## **A Level Biology Transition Work**

Hello Y11 Biologist - Meadowhead Science department are so pleased to see lots of you planning to take Biology at A-Level. It really is a fantastic subject and I think you will enjoy studying it and get a lot out of it.

Over the Summer holidays, the A-Level Biology team would like you to do some "transition work". The aim of this is to keep your brain cells ticking along nicely and to consolidate your understand of some GCSE Biology ideas. Do not worry about trying to read ahead or start learning the A-Level course yet. There is lots of it, and it is tricky, but remember you will have 5 hours of lessons each week and do lots of independent study too. So do not panic!

The tasks are from the "official" AQA A-Level Biology transition booklet, read through the booklet up to page 9 then complete the activities. It's not a huge pile of work but you could space out the tasks and build them over the coming weeks.

You can hand in activities through class charts, either with a scan, or photo, or a word document, or whatever works for you! That way we can give you some feedback.

All the very best and stay safe,

Mr Stephenson, Mrs Markham and Miss Moore
